

FINANCIAL TRANSPARENCY COALITION

The Financial Transparency Coalition will be hosting a panel event next week on the recent G20/OECD discussions on global corporate minimum tax - and whether the agreements go far enough.

The FTC's event will discuss what was agreed at the G20 finance ministers' summit, and whether it will make any real difference. Will the agreement finally kill tax havens and benefit the poorest countries that are struggling to raise enough funds to fight the Covid-19 pandemic, despite its apparent pitfalls? Are developing countries planning to reject this deal after the G20 summit, and what tactics could they use to get a better deal?

When: July 16th at 13.00 UTC
